**AGENCY:** Office of Global Programs, National Oceanic and Atmospheric Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** The Pan-American Climate Studies (PACS) Program is a contribution to the National Oceanic and Atmospheric Administration (NOAA) Climate and Global Change Program, and as such is designed to improve our ability to observe, understand, predict, and respond to changes in the global environment. This program builds on NOAA's mission requirements and longstanding capabilities on global change research and prediction. The PACS Program is a contributing element of the U.S. Global Change Research Program (USGCRP), which is coordinated by the interagency Committee on Environmental and Natural Resources. NOAA's program is designed to complement other agency contributions to that national effort. The PACS Program has a timeframe of 1995-2004.

**DATES:** Strict deadlines for submission to the FY 1998 process are: Letters of intent must be received at OGP no later than Friday, October 3, 1997. Full proposals must be received at OGP no later than Friday, December 5, 1997. We anticipate

that review of full proposals will occur during early 1998 and funding should begin during the spring of 1998 for most approved projects. May 1, 1998, should be used as the proposed start date on proposals, unless otherwise directed by a program manager. Applicants should be notified of their status within 6 months. All proposals must be submitted in accordance with the guidelines below. Failure to heed these guidelines may result in proposals being returned without review.

#### **SUPPLEMENTARY INFORMATION:**

##### **Funding Availability**

This Program Announcement is for projects to be conducted by investigators both inside and outside of NOAA, over a period of up to three years. Actual funding levels will depend upon the final FY 1998 budget appropriations, current plans are for approximately \$1.2 million to be available for new (or renewing) PACS awards. The funding instrument for extramural awards will be a grant unless it is anticipated that NOAA will be substantially involved in the implementation of the project, in which case the funding instrument should be a cooperative agreement. Examples of substantial involvement may include but are not limited to proposals for collaboration between NOAA or NOAA scientists and a recipient scientist or technician and/or contemplation by NOAA of detailing Federal personnel to work on proposed projects. NOAA will make decisions regarding the use of a cooperative agreement on a case-by-case basis. Funding for non-U.S. institutions and contractual arrangements for services and products for delivery to NOAA are not available under this announcement. Matching share is not required by this program.
